# Work with Designercarpets

Each carpet is commissioned as required and in joint development, without any mass production. In close cooperation with international designers and architectural offices, DESIGNERCARPETS produces carpets and kilims for private individuals, hotels, public spaces, shipyards and fashion labels.

The production sites are located in the countries of the Orient and the Far East. The main production is in Kathmandu, the capital of Nepal. The cooperation is based equally on the strengths of the respective partners and on long-term collaboration. Personal contact is very important; constant discussions, joint developments and friendships form the basis.

The company is in its third generation and is based in southern Germany (Lörrach, Basel, Mulhouse). The passion for traditional craftsmanship combined with innovative designs, the high quality standards and customer orientation unites all employees of Designercarpets.

## Why Partner with us?

Profit from over 30 years of expertise and:

- Free samples of our collection
- Free customized samples for your projects and joint development
- Professional project management and real collaboration
- Above average conditions for interior designers and architects
